# SAFETY DATA SHEET

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

Product name : TEKNODUR 0290

**1.2 Relevant identified uses of the substance or mixture and uses advised against Product description** : Paint.

#### 1.3 Details of the supplier of the safety data sheet

Teknos (UK) Limited, Unit E1, Heath Farm, Banbury Road, Swerford, Oxfordshire OX7 4BN, United Kingdom. Tel. +44 (0) 1608 683 494.

Teknos Group Oy, Takkatie 3, FI-00370 HELSINKI, FINLAND. Tel. +358 9 506 091. e-mail: sds@teknos.fi Business ID: 2203752-5

#### National contact

Teknos (UK) Limited, Unit E1, Heath Farm, Banbury Road, Swerford, Oxfordshire OX7 4BN, United Kingdom. Tel. +44 (0) 1608 683 494.

#### 1.4 Emergency telephone number

National advisory body/Poison Centre

Telephone number : NHS: 111 (for advise), 999 (for emergency).

### **SECTION 2: Hazards identification**

### 2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 STOT SE 3, H335 STOT RE 2, H373 Aquatic Chronic 3, H412

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

**Hazard pictograms** 

| Signal word       | : Warning   |
|-------------------|---|
| Hazard statements | : H226 - Flammable liquid and vapour.                                     |
|                   | H319 - Causes serious eye irritation.                                     |
|                   | H315 - Causes skin irritation.  |
|                   | H335 - May cause respiratory irritation.                                  |
|                   | H373 - May cause damage to organs through prolonged or repeated exposure. |
|                   | H412 - Harmful to aquatic life with long lasting effects.                 |

#### **Precautionary statements**

| TEKNODUR 0290                  |             |                        |             | Label No | :13426 | 6    |
|--------------------------------|-------------|------------------------|-------------|----------|--------|------|
| Date of issue/Date of revision | :01/09/2016 | Date of previous issue | :03/05/2016 | Version  | :2     | 1/15 |

# **SECTION 2: Hazards identification**

| Prevention  | : P280 - Wear protective gloves. Wear eye or face protection.  |
|---|--|
|   | P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.<br>P273 - Avoid release to the environment.  |
| Response  | <ul> <li>P304 + P312 - IF INHALED: Call a POISON CENTER or physician if you feel unwell<br/>P303 + P353 - IF ON SKIN (or hair): Rinse skin with water or shower.</li> </ul>                  |
| Storage   | : P403 - Store in a well-ventilated place.   |
| Disposal  | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazardous ingredients   | : Solvent naphtha (petroleum), light aromatic<br>Xylene  |
| Supplemental label<br>elements  | <ul> <li>Contains Bis(1,2,2,6,6-pentamethyl-4-piperidyl)sebacat, Methyl-(1,2,2,6,<br/>6-pentamethyl-4-piperidyl)sebacat and Butyl acrylate. May produce an allergic<br/>reaction.</li> </ul> |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :  |

#### 2.3 Other hazards

Other hazards which do : None known. not result in classification

# **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

| Eye contact                | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
|----------------------------|--|
| Inhalation                 | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If it is suspected that fumes are still present, the rescuer should wear an appropriate<br>mask or self-contained breathing apparatus. If not breathing, if breathing is irregular<br>or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give mouth-to-mouth<br>resuscitation. Get medical attention. If necessary, call a poison center or physician.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband.  |
| Skin contact               | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion                  | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air<br>and keep at rest in a position comfortable for breathing. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention following exposure or if feeling unwell. Never give anything by mouth to an<br>unconscious person. If unconscious, place in recovery position and get medical<br>attention immediately. Maintain an open airway. Loosen tight clothing such as a<br>collar, tie, belt or waistband. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.   |

### 4.2 Most important symptoms and effects, both acute and delayed

| TEKNODUR 0290                  |                                     |             | Label No :13426  |  |
|--------------------------------|-------------------------------------|-------------|------------------|--|
| Date of issue/Date of revision | : 01/09/2016 Date of previous issue | :03/05/2016 | Version : 2 3/15 |  |

# SECTION 4: First aid measures

| Potential acute health e  | <u>ffects</u>   |
|---------------------------|---|
| Eye contact               | : Causes serious eye irritation.  |
| Inhalation                | : May cause respiratory irritation.   |
| Skin contact              | : Causes skin irritation.   |
| Ingestion                 | : No known significant effects or critical hazards.   |
| Over-exposure signs/sy    | <u>imptoms</u>  |
| Eye contact               | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing   |
| Skin contact              | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                 | : No specific data.   |
| 4.3 Indication of any imm | nediate medical attention and special treatment needed  |
| Notes to physician        | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
| Specific treatments       | : No specific treatment.  |

# **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                        |  |
|--|--|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| 5.2 Special hazards arising                    | om the substance or mixture  |
| Hazards from the substance or mixture          | : Flammable liquid and vapour. In a fire or if heated, a pressure increase will occur<br>and the container may burst, with the risk of a subsequent explosion. Runoff to<br>sewer may create fire or explosion hazard. This material is harmful to aquatic life<br>with long lasting effects. Fire water contaminated with this material must be<br>contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion<br>products               | : In a fire, decomposition may produce toxic gases/fumes.  |
| 5.3 Advice for firefighters                    |  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident in there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure  |

chemical incidents.

:03/05/2016

mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro   | tective equipment and emergency procedures   |
|---------------------------------|--|
| For non-emergency<br>personnel  | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
| For emergency responders        | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions   | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.  |
| 6.3 Methods and material for    | containment and cleaning up  |
| Small spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

| Protective measures                       | Put on appropriate personal protective equipment (see Section 8). Do not breathe vapour or mist. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|---|--|
| Advice on general<br>occupational hygiene | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

### 7.2 Conditions for safe storage, including any incompatibilities

### **SECTION 7: Handling and storage**

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

### Seveso Directive - Reporting thresholds (in tonnes)

### Danger criteria

|   | Notification and MAPP threshold | Safety report threshold |
|---|---------------------------------|-------------------------|
| P5c: Flammable liquids 2 and 3 not falling under P5a or P5b | 5000                            | 50000                   |
| C6: Flammable (R10)   | 5000                            | 50000                   |

#### 7.3 Specific end use(s)

| Recommendations            | : Not available. |
|----------------------------|------------------|
| Industrial sector specific | : Not available. |
| solutions                  |                  |

### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

### **SECTION 8: Exposure controls/personal protection**

of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available

| 8.2 Exposure controls            |   |
|----------------------------------|---|
| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Individual protection meas       | ures  |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                  |   |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|                                  | Recommendations : Wear suitable gloves tested to EN374.<br>< 1 hour (breakthrough time): Nitrile gloves. thickness > 0.3 mm<br>1 - 4 hours (breakthrough time): polyvinyl alcohol (PVA) thickness > 0.3 mm or<br>4H / Silver Shield® gloves.<br>> 8 hours (breakthrough time): Viton® thickness > 0.3 mm gloves   |
|                                  | Wash hands before breaks and immediately after handling the product.  |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods.  |
| Other skin protection            | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection           | <ul> <li>Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.</li> <li>Filter type: A spray application Filter type: A P</li> </ul>  |
|                                  |   |

# **SECTION 8: Exposure controls/personal protection**

| Environmental exposure | : Emissions from ventilation or work process equipment should be checked to        |
|------------------------|--|
| controls               | ensure they comply with the requirements of environmental protection legislation.  |
|                        | In some cases, fume scrubbers, filters or engineering modifications to the process |
|                        | equipment will be necessary to reduce emissions to acceptable levels.              |

| routes of exposure        |                  |

Potential acute health effects

| Eye contact : | Causes serious eye irritation.                    |
|---------------|---|
| Inhalation    | May cause respiratory irritation.                 |
| Skin contact  | Causes skin irritation.                           |
| Ingestion     | No known significant effects or critical hazards. |

### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
|--------------|--|
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion    | : No specific data.  |

### Delayed and immediate effects and also chronic effects from short and long term exposure

### **SECTION 11: Toxicological information**

Potential delayed effects : Not available. Potential chronic health effects Not available. **Conclusion/Summary** : Not available. General : May cause damage to organs through prolonged or repeated exposure. Carcinogenicity : No known significant effects or critical hazards. **Mutagenicity** : No known significant effects or critical hazards. : No known significant effects or critical hazards. Teratogenicity **Developmental effects** : No known significant effects or critical hazards. **Fertility effects** : No known significant effects or critical hazards.

Other information : Not available.

## **SECTION 12: Ecological information**

### 12.1 Toxicity

| Product/ingredient name                           | Result                            | Species                                    | Exposure |
|---|-----------------------------------|--|----------|
| Solvent naphtha (petroleum), light aromatic       | Acute EC50 3.2 mg/l               | Daphnia                                    | 48 hours |
| -   | Acute LC50 9.2 mg/l               | Fish                                       | 96 hours |
| Xylene  | Acute LC50 8500 µg/l Marine water | Crustaceans - Palaemonetes<br>pugio        | 48 hours |
|   | Acute LC50 13400 µg/l Fresh water | Fish - Pimephales promelas                 | 96 hours |
| n-Butyl acetate                                   | Acute LC50 18000 µg/l Fresh water | Fish - Pimephales promelas                 | 96 hours |
| ethylbenzene                                      | Acute EC50 4600 µg/l Fresh water  | Algae - Pseudokirchneriella<br>subcapitata | 72 hours |
|   | Acute EC50 3600 µg/l Fresh water  | Algae - Pseudokirchneriella subcapitata    | 96 hours |
|   | Acute EC50 6530 µg/l Fresh water  | Crustaceans - Artemia sp<br>Nauplii        | 48 hours |

| 12.6 Other adverse effects       | :    | No known significant effects or critical hazards.  |
| SECTION 13: Dispos               | sal  | considerations   |
| 13.1 Waste treatment metho       | ds   |  |
| Product                          |      |  |
| Methods of disposal              | :    | The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste                  | :    | The classification of the product may meet the criteria for a hazardous waste.   |
| European waste catalogu<br>(EWC) | e :  | 080111*, 200127*   |
| <u>Packaging</u>                 |      |  |
| Methods of disposal              | :    | The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.   |
| Special precautions              | :    | This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.          |
