

Temalac SC-F 40

DESCRIPTION

A high-solids alkyd paint, containing anti-corrosive pigments.

PRODUCT FEATURES AND RECOMMENDED USES

- Recommended as a single coat system for steel surfaces both indoors and outdoors
- Good application properties
- · High film build
- Recommended for steel framework, service platforms and different types of machinery and equipment

TECHNICAL DATA

Volume solids 61±2% (ISO 3233)

Weight solids 76±2%

Specific gravity 1.5 kg / I depending on colour.

Recommended film thicknesses and theoretical coverage

Recommended film thicknesses		Theoretical coverage	
wet	dry		
160µm	100µm	6,1 m²/l	
200μm	120µm	5,1 m²/l	

Practical coverage depends on the application method, painting conditions and the shape and roughness of the surface to be coated.

Drying time

DFT 80µm	+10°C	+23°C	+35°C
Dust dry, after	30min	20min	10min
Touch dry, after	8h	5h	3h
Recoatable, after	2 weeks	1 week	1 week

Drying and recoating times are related to the film thickness, temperature, the relative humidity of the air and ventilation.

Gloss Semi-gloss.

Color shades RAL, NCS, SSG, BS, MONICOLOR NOVA and SYMPHONY colour cards. Temaspeed

Premium tinting.

Temalac SC-F 40

APPLICATION INSTRUCTIONS

Surface preparation Oil, grease, salts and dirt are removed by appropriate means. (ISO 12944-4)

Steel surfaces: Blast clean to grade Sa21/2. (ISO 8501-1) If blast cleaning is not possible,

phosphating is recommended for cold rolled steel to improve adhesion.

Primed surfaces: Oil, grease, salt and dirt are removed from the surface by appropriate means. Repair any damage to the primer coat. Note the overcoating time of primer. (ISO

12944-4)

Recommended primers Temalac SC-F 40.

Recommended topcoats Temalac SC-F 40.

Application conditions All surfaces must be clean, dry and free from contamination. The temperature of the

ambient air, surface and paint should not fall below +5°C during application and drying. Relative humidity of the air should not exceed 80% during application and drying. The surface temperature of steel should remain at least 3°C above the dew point. Good ventilation and sufficient air movement is required in confined areas during application

and drying.

Application Stir the product carefully before use.

For airless spraying, the product is thinned approximately 0–5%. Recommended nozzle tip is 0.011"–0.015" and pressure 160–200 bar. Spray angle shall be chosen according to

the shape of the object.

For conventional spraying, the product is thinned approximately 5-10%. Recommended

nozzle tip is 1.6–1.8 mm and pressure 3–4 bar.

In order to reach thicker coats use "wet-on-wet" technique.

Thinners Thinner 1006

Cleaning of equipment Thinner 1006.

VOC The Volatile Organic Compounds amount of the paint mixture is 360 g/litre of paint.

VOC content in ready to use paint (thinned 10% by volume) is 410 g/l.

HEALTH AND SAFETY Containers are provided with safety labels, which should be observed. Further information

about hazardous influences and protection are detailed in individual health and safety data

sheets.

A health and safety data sheet is available on request from Tikkurila Oyj.
